

Read the [NYT article](#) and watch [Dr. Sugata Mitra's TED talk](#). Next, discuss the following questions with your group:

1. Describe kids/teenagers' access to computers in the two scenarios (NYT article and TED talk).
2. How are kids/teenagers using the computer? What are the differences and similarities?
3. What are some hypotheses we can elaborate to explain their different uses of the computer?
4. Which approach to the digital divide does better explain the situation presented in the TED talk and the NYT article?
5. What are some of the skills these young people can learning given how they use the computer?
6. Which scenario do you think can be more successful over time?
